Experience

Full Stack Developer, Kaana AI Technologies

Jan 2026 – Mar 2026, Hyderabad

- Built an end-to-end brand-influencer marketplace (Web + Mobile) with scalable backend architecture.
- Designed structured service-controller architecture using **PostgreSQL + Prisma**.
- Developed secure APIs with **RBAC**, authentication, and optimized database queries.
- Delivered responsive UI using **Next.js and React Native** with performance optimization.

Full Stack Developer, ElevenX Agency

Jul 2025 – Dec 2025

- Developed and deployed full-stack applications from design to production.
- Built responsive frontend systems and integrated backend APIs.
- Focused on performance, SEO, and scalable architecture.

Projects

Influmojo — Brand & Influencer Marketing Platform

- Built a full-stack, cloud-native marketplace connecting brands and influencers across web and mobile platforms.
- Designed scalable backend architecture using **PostgreSQL, Prisma, and modular service-controller patterns**.
- Developed high-performance APIs with **authentication, RBAC, campaign management, and real-time workflows**.
- Containerized the entire system using **Docker** with isolated services and production-ready deployment pipelines.
- Integrated cloud infrastructure for hosting, database management, and scalability, ensuring high availability and performance.
- Delivered responsive frontend using **Next.js and React Native** with optimized state management and seamless UX.

NexaGrow Farms

[Link](#)

- Developed high-conversion website with strong UI/UX and SEO optimization.
- Built responsive layouts and structured content flow.

Delhi Wala Halwai

[Link](#)

- Built digital storefront enabling seamless access to traditional food products.
- Improved user experience and purchase flow through structured UI.

Talora – HR Platform

[Link](#)

- Developed role-based dashboard connecting candidates, HRs, and admins.
- Built scalable frontend architecture for dynamic workflows.

React Dog — 3D Portfolio

[Link](#)

- Built immersive 3D experience using **Three.js and React Three Fiber**.
- Implemented scroll-driven animations using **GSAP**.
